

Mind Map

(Differentiated)

For this exercise your students will be asked to produce a Mind Map using differentiated exercises.

The first exercise is to underline or highlight the keywords.

Students are then able to select one of the differentiated tasks. Each task is colour coded as follows:

Green- Challenging task aimed at supporting lower ability students.

Amber- Challenging task aimed at extending middle ability students.

Pink- Challenging task aimed at extending higher ability students.

As an additional exercise you could ask students to attempt to answer the question. This could then be revisited at a later point in the lesson to see if they were correct.

This exercise is ideally carried out as individuals or in pairs.
