

10 Questions

(Differentiated)

The aim of this exercise is for pupils to explore a given word.

Working in groups of 4, one pupil is given a word on a piece of card and the other 3 group members have 10 questions to ask to find out what the word is.

Using the countdown slides on the resource you can time the spaces between each question so that pupils discuss what question to ask next.

- You can use as many or few questions as you like by only using those slides on the resource that you require.
- You can either provide the words for pupils or let them choose their own.

Don't have an interactive whiteboard...

You can complete the task in the same way but can call out the timings for each question. To further support try making cards numbered one to ten to hold up and remind pupils.

To differentiate using **GAP**:

To differentiate this task consider the difficulty of the words that you give to students. To support the green task you could also supply the meaning of the word to help the student being questioned.

Green	To challenge yourself and group members choose the 'Green' words to guess.
Amber	To further challenge yourself and group members choose the 'Amber' words to guess.
Pink	To extend yourself and group members choose the 'Pink' words to guess.

OUTSTANDING LESSON PLANNING
