

# Lesson Basics- Exam/test

## **Develop a clear approach to exam technique through a consistent approach**

Tests are a crucial aspect to assessing students' progress towards a particular aspect of learning. Using a simple, consistent approach to exam technique can ensure that students maximise the use of their time allocation and to do as the question is asking. This can be easily achieved through rereading the questions, highlighting keywords to assess against and regularly checking the time allocated, ideally per question.

### Spotlight/Focus...

- Read each question carefully and underline keywords
- Check your answers against the keywords in the question
- Check to see how much time you have remaining

### Teacher spotlight...

- Provide a consistent approach to exam technique
- Encourage the identifying of keywords to ensure students do as the question asks and gives them a mechanism to check their work
- Use timers so that students can keep on track and try to apply this through timings per question
