

Blog

Get students to use the information that they have learnt to create a series of blog posts to demonstrate and apply their learning.

Using the information from the task students are to write a series of statements (at least 3) which form a blog. These should summarise each point and contain their own thoughts on the issues. Students can maximise the content of their blog by using the GAP tasks.

If using GAP you will need to complete the GAP worksheet to outline the variation in challenge and support available for the task-

- Green- Supportive version of the task
- Amber- The original version of the main task
- Pink- Challenging version of the task
