

Diagram

Get students to create a diagram to demonstrate and apply their learning. They will need to consider how to translate information into graphical form.

Students are to create a diagram using the information that they have been given. This should use a combination of geometric shapes and text to show the information. Students can maximise the content of their diagram by using the GAP tasks.

If using GAP you will need to complete the GAP worksheet to outline the variation in challenge and support available for the task-

- Green- Supportive version of the task
- Amber- The original version of the main task
- Pink- Challenging version of the task
