

Flowchart

Get students to create a flowchart to demonstrate and apply their learning. They will need to consider how to translate information into graphical form.

Students are to present the information that they have been given as a flowchart. They need to show the main points as actions and use decisions to show how points relate to each other. Students can maximise the content of their flowchart by using the GAP tasks.

If using GAP you will need to complete the GAP worksheet to outline the variation in challenge and support available for the task-

- Green- Supportive version of the task
- Amber- The original version of the main task
- Pink- Challenging version of the task
