

Mini Sculpture

Get students to design and make a mini sculpture that challenges them to demonstrate and apply their learning.

Students present the information that they have been given as a mini sculpture. They will be given a collection of resources that you can then model into a 3D image related to the task. They can maximise the content of their sculpture by using the GAP tasks.

If using GAP you will need to complete the GAP worksheet to outline the variation in challenge and support available for the task-

- Green- Supportive version of the task
- Amber- The original version of the main task
- Pink- Challenging version of the task
