

Picture Mind Map

Get students to create a picture mind map to demonstrate and apply their learning. They will need to consider how to translate information into pictures.

Students are to present the information that they have been given as a mind map using pictures only. They are to represent each point related to the task using a sketch and only use text if really necessary. Students can maximise the content of their mind map by using the GAP tasks.

If using GAP you will need to complete the GAP worksheet to outline the variation in challenge and support available for the task-

- Green- Supportive version of the task
- Amber- The original version of the main task
- Pink- Challenging version of the task
