

Step-by-step (drawn)

Get students to produce a drawn step-by-step plan that challenges them to demonstrate and apply their learning.

Students present the information they have been given as a step-by-step guide using drawings. This should break the information down into sections that are then shown in the correct order. They use a limited amount of text to help explain.

If using GAP you will need to complete the GAP worksheet to outline the variation in challenge and support available for the task-

- Green- Supportive version of the task
- Amber- The original version of the main task
- Pink- Challenging version of the task
